

Sure Clamp

PRODUCT INFORMATION FIXED PLANT

Function

- To provide an effective means of securing skirting rubber to the throat of the conveyor chute thus enabling a positive seal
- Assists in the process of minimizing environmentally damaging dust escaping from conveyor transfer points
- Positively clamps the rubber skirt seal to the chute throat
- Sure Clamp is available in two configurations:

Sure Clamp primarily used for new and existing installations

Sure Clamp Mini primarily used for retrofitting onto existing conveyors where there is significant height space restrictions

Advantages

- CQMS Razer is a 100% Australian owned and operated company
- CQMS Razer Sure Clamp is manufactured from 100% stainless steel for a long and trouble free life cycle
- Can be installed as a complete mechanism as an aid to installation or as separate components in tight fitting applications
- Arrives on site pre-assembled and ready for installation
- Retains all its safety features even when cut to special lengths
- Safety pins installed to ensure that the clamping mechanism will not vibrate loose over time
- Acme thread ensures rapid adjustment and prevents thread seizure
- Secures all thicknesses of skirt rubber, up to a maximum of 19mm
- Can be mounted vertically or perpendicular to the conveyor belt surface

PROUDLY DISTRIBUTED BY:

Applications

- All conveyor transfers
